ENGINEERING CYBERNETICS

Soviet journal of computer and systems science

CONTENTS FOR 1978

Number 1

	English Page	Russian Page
CONTROL PROBLEMS AND INVESTIGATION OF OPERATIONS		
T.N. Danil'chenko and A.F. Kononenko: Regularization of Many-Step Games between Two Persons with a Fixed Sequence of Moves	1	5
P.B. Gusyatnikov: The Necessity of a Certain Sufficient Condition for Optimality of the Pursuit Time	7	11
A. Azamov: Construction of Optimal Strategies in an Infinite Game between Two Persons	18	22
M.S. Shtil'man: Repeating Games with Changing Value of the Payment Unit. I. Attainable Vectors of the Winnings	22	26
Yu.M. Kuleshov, V.A. Kalashnikov, and V.M. Kureychik: Local Optimization of Functions on Graphs	29	34
Yu.G. Stoyan and L.D. Ponomarenko: A Rational Arrangement of Geometric Bodies in Automated Design Problems	34	39
A.I. Polyakov: Software for Planning of Remotely Controlled Irradiation Therapy	43	48
ARTIFICIAL INTELLECT AND ROBOTS		
R.B. Baglay: Approximate Methods for Reconstruction of Images of an Object	49	54
QUEUEING AND RELIABILITY		
V.G. Ushakov: A Single-Line Servicing System with Relative Priority	59	76
I.M. Dukhovnyy: Structurally Complicated Queueing Systems	64	81
V.A. Popov and A.L. Litvinov: Statistical Model of a Buffer Memory of a Control Computer Complex with Group Selection	73	91
M.G. Tiplitskiy: Certain Problems of Control of a Finite Markov Chain	77	96
V.V. Konev: Optimal Standby with Renewal of a Group of Elements of the Same Kind	82	101
A.V. Zhesan: Conditions for Reliability of Estimates Obtained by the Smallest Moduli	87	107
THEORY OF AUTOMATA AND COMPUTATIONAL SYSTEMS		
V.I. Shvetsov: Extremal Problems in Data Processing. I	91	111
G.A. Kengerlinskiy: An Informational Approach to the Decomposition of Complex Systems	91	121
G.B. Roshchin: The Finding of a Minimal Skeleton of a Graph	97	129
N.G. Bruyevich, B.Ye. Chelishchev, and I.V. Bobrova: Mathematical Foundations of the Automation of Planning of Processes of Mechanical of Processing of Details	101	134

	English Page	Russian Page
TRANSMISSION OF INFORMATION		
N.K. Kul'man and V.M. Khametov: Optimal Extrapolation of Markov Processes on a Background of Noises	102	149
A.V. Dmitriyev and D.V. Yezhov: A Case of Mixed Teaching	108	155
N.N. Katomin and B.A. Yufryakov: Recurrent Filtering of a Markov Informational Process with Two-Dimensional Discrete Argument	109	157
AUTOMATIC CONTROL		
M.M. Khrustalev and R.Yu. Bakhito (Deceased): Synthesis of Optimal Control in Linear Systems	118	165
I.M. Sidorov and V.V. Timofeyev: Analysis of Two-Frequency Regimes of Operations in a Stabilization System	127	174
I.L. Pis'mennyy: Harmonic Linearization of Single-Valued Nonlinear Characteristics in the Case of Two-Frequency Oscillations	135	183
AUTOMATION OF INVESTIGATIONS		
V.V. Aleksandrov, V.M. Lachinov, and A.O. Polyakov: Recursive Algorithmization of a Curve that Fills a Multidimensional Interval	144	192
V.I. Kostyuk, R.I. Polonnikov, V.Ye. Kraskevich, and K.Kh. Zelenskiy: Structural Identification in the Frequency Region of Nonlinear Objects with Distributed Parameters	150	199
P.B. Antonov: Approximate Solution of the Problem of Distribution of Homogeneous Media	158	211
V.A. Bogatyrev: A Method of Speeding up the Procedure of Estimating the Indices of Reliability of Complicated Systems	163	214

Number 2

MANAGEMENT AND OPERATIONS RESEARCH		
I.V. Ezhkova and D.A. Pospelov: Decision Making on Fuzzy Premises II. Deduction Schemes	1	5
Ye.P. Gordiyenko: Stability of Problems of Optimizing Systems When There are Random Disturbances of the Probability Distributions	7	12
O.Yu. Pershin: Optimal Projection of Dendriform Communicational Networks	12	18
A.Ye. Mishchenko and V.V. Shafranskiy: The Use of Grid Models with "Intermediate" Resources in the Case of Volume-Calendar Planning of Work Complexes	23	29
G.Ye. Naumov: The Rule of Multipliers for a Vector Problem of Optimization with an Infinite Set of Criteria	29	36
V.I. Meleshko: Accelerated Algorithms for Adaptation in Problems with Indeterminacy on the Basis of the Theory of Pseudoinverse Operators	31	39
B.I. Model': A Certain Class of Differential Games	32	53
ARTIFICIAL INTELLECT AND ROBOTS		
V.M. Matrosov and S.N. Vasil'yev: A Comparison Principle for Automatic Derivation of Theorems I	39	60
Ye.V. Aleksandrovich: The Human Eye as a Link in a Biotechnological Control System	49	70
A.F. Vereschagin and V.L. Generozov: Design of Trajectories of Operating Device of Automatic Manipulator	55	76
MASS SERVICING		
V.K. Demin and A.N. Serov: Construction of Estimational Distributions for a priori Disciplines for Servicing a Finite Number of Orders	65	88
V.A. Aleksandrov and V.A. Ivnitskiy: Estimation of the Results of Simulation in the Case of Inexact Input Information	69	92

	English Page	Russian Page
Ye.N. Ostrovskiy and V.T. Radiokhin: On a One-Dimensional Markov Process's Getting Beyond a Curve of a Special Form	77	100
I.A. Sokolov: Joint Distribution of the Waiting Time on the Part of Orders of Different Priorities	81	104
THEORY OF AUTOMATA AND COMPUTATIONAL SYSTEMS		
V.F. Guzik: Representation of Problems for Modular Digital Computational Structures in an Operator Space	88	111
L.A. Rastrigin and R.Kh. Erenshteyn: A Collection of Algorithms for Generalizing the Algorithms for Solving Problems	92	116
V.I. Shvetsov: Extremal Problems of Data Processing. II	101	127
I.S. Abbakumov, V.S. Khapov and Y.A. Chernyshov: Methods of Testing System with Majorizing Reservation	102	135
TRANSMISSION OF INFORMATION		
I.A. Bol'shakov and V.S. Rakoshits: Application of Orthogonal System of Discrete Function to Microprocessor Processing of Signals. II	108	142
M.M. Fishman: Distribution of the Duration of a Sequential Procedure in the Case of Nonstationary Correlated Observations	122	157
E.M. Khazen and L.G. Kankanyan: Informational Estimates for Increase of Risks in Problems Regarding the Optimal Setting up of Observations	132	167
AUTOMATIC CONTROL		
Yu.D. Yegorov and V.S. Kislyakov: Definition of Renewal of Functionals Being Optimized in Analytical Construction Problems	140	175
G.P. Chigin: Simulation of an Optimal Correlationally Extremal System	146	182
BRIEF COMMUNICATIONS		
L.G. Khachiyan and A.I. Erlikh: Serial Game Processes of Solution of Convex Programming Problems	147	193
Yu.G. Pavlov: Sensitivity of the Coordinates of the Optimum to Disturbances of the Coefficients in Linear Programming Problems	151	196
V.V. Zakharov and V.T. Presler: Stability of Statistical Methods of Estimating the Gradient with Respect to the Form of the Distribution Density of the Variables and the Accuracy with Which They are Fixed	156	200
I.V. Russman: Complex Estimation of a System and Estimates of Subsystems	158	201
V.P. Chernyshev: The Optimal Servicing Discipline in a Multichannel System with a Limited Queue	161	204
V.S. Zasukhin: Adaptive Control of Semi-Markov Processes	165	207
V.V. Danilov, A.N. Zhirabok and F.V. Filippov: Derivation of Identifying Tests for Automata	173	213

Number 3

CONTROL PROBLEMS AND INVESTIGATION OF OPERATIONS		
V.Ye. Krivonozhko and A.I. Propoy: The Method of Successive Improvement of Control in Dynamic Linear Programming Problems. I	1	5
A.M. Brusilovskiy and G.M. Ostrovskiy: A Decompositional Method of Optimizing Complex Systems	13	17
L.G. Babat: A Problem with Fixed Payments	21	25
E.I. Volynskiy and I.A. Zil'berman: On the Choice of Penalty Coefficient in Iterative Methods of Linear Programming	27	32
Ye.Ya. Gik and A.B. Zhornitskiy: Properties of Cyclic Extensions of Flows in a Network	33	38
I.V. Ioslovich and O.V. Rozhnova: Mathematical Models for Air Cargo Batch Assembly	40	45

	English Page	Russian Page
ARTIFICIAL INTELLECTS AND ROBOTS		
E.M. Pogosyan: Training as a Variety of Induction Inference	46	62
G.K. Moskatov: Applications of Adaptive Nonlinear Filtering to the Problems of Navigation of an Autonomous Deep Submergence Vehicle	53	70
QUEUEING AND RELIABILITY		
V.V. Kozlov and A.D. Solov'yev: Optimal Servicing of Renewable Systems. I	62	79
M.A. Fedotkin: The Problem of Control of Intersecting Traffic Flows	66	85
V.V. Kalashnikov: Solution of the Problem of Approximating a Denumerable Markov Chain	73	92
Ye.A. Dzhalalov: Multichannel Queueing Systems with Feedback	78	96
Kh.K. Karapenev: Estimation of the Reliability of a Standby System with Renewal and Lag in the Detection of Failures	88	107
L.V. Rykova: Estimates of the Cardinalities of Classes of a Set in the Case of Control of Reliability with Errors	94	113
THEORY OF AUTOMATA AND COMPUTATIONAL SYSTEMS		
D.A. Kirillov and M.G. Mikheyev: Principles of Virtual Networks of Forwarding Communications	104	122
V.F. Guzik: Construction of a Basis in Operator Space for Modular Digital Computation Structures	104	129
V.A. Kalashnikov and V.A. Pertsev: An Approach to the Solution of the Problem of Function Partitioning of the Structure of a Combination Automaton	109	134
INFORMATION PROCESSING		
A.K. Rybin: Effectiveness and Stability of Estimation of the Parameters of a Strong Signal in the Case of Non-Gaussian Noises	115	140
G.A. Golubev: Minimax Linear Filters of Coordinates of Dynamic Objects	129	155
L.G. Krasnyy: Optimal Distinguishing and Detection of Signals as a Nonlinear Filtering Problem	137	163
AUTOMATIC CONTROL		
E.M. Dzhafarov: The Problem of Optimization of Systems with Variable Structure	138	171
B.I. Shakhtarin: Investigation of a Nonlinear Fixed-Order System by Approximate Methods	142	176
A.M. Batkov and B.Ye. Fedunov: Conditions for Optimality of Program Control of an Object Subject to Random Influences	152	186
AUTOMATION OF RESEARCH		
V.K. Labutin, I.F. Sapozhkova, and V.N. Chechulin: On a Class of Forms Which are Invariant with Respect to Cyclic Shifts and Their use in a Controlled Experiment	161	195
BRIEF COMMUNICATIONS		
Ye.I. Gordienko: A Remark on Stability in Prediction and Filtering Problems	168	202
L.I. Tukachinskiy: An Estimate of the Probability of Failure of an Element, Based on Test Results of a Series-Connected System	172	205
M.I. Volkovinskiy and A.N. Kabalevskiy: An Analysis of Multilevel Priority Systems with Preparation and Realignment of the Queueing Device II. Joint Distributions of Queue Lengths	176	209

Number 4

MANAGEMENT AND OPERATIONS RESEARCH		
V.Ye. Krivonozkho and A.I. Propoy: The Method of Successive Improvement of a Control in Dynamic Linear Programming Problems. II	1	5
P.L. Buzytskiy and A.A. Votyakov: An Algorithmic Criterion of Optimality in Integer Programming	10	15
V.I. Shvetsov: Optimization of Multilevel Organization of Data	18	24
V.F. Pakhomov: Information Approach to the Aggregation Problem	22	29
ARTIFICIAL INTELLIGENCE AND ROBOTS		
V.M. Matrosov and S.N. Vasil'yev: A Comparison Principle for Theorem Deducing. II	32	40
G.S. Aksenov, D.K. Voronetskaya, and V.N. Fomin: A Construction of Program Movements of a Manipulator with the Aid of a Computer	40	50
A.F. Vereshchagin and L.N. Minayev: Principles of Construction of Specialized Computers for Positional Supervisor Control of a Manipulator	45	56
V.M. Baklanov and E.V. Popov: The "Understanding" of Sentences in a Restricted Russian Language	52	66
QUEUES AND RELIABILITY		
V.V. Kozlov and A.D. Solov'yev: Optimal Servicing of Renewal Systems. II	53	75
G.K. Kel'mans, L.M. Lyubchik, and A.S. Poznyak: Adaptive Control of Closed Priority Queueing Systems	58	81
F.L. Abdrakhmanov and A.V. Akhmetzyanov: Setting up of Priority Classes in the Optimization of Functioning of a Particular Class of Multichannel Queueing Systems	70	94
V.A. Gadasin and A.S. Lakayev: Estimation of the Reliability of Retranslation Grids by the Method of Decomposition	71	100
A.V. Matveyev: Estimation of the Probability of Parametric Failure	76	106
COMPUTERS AND AUTOMATON THEORY		
V.P. Koryachko: Efficient Organization of a System of Processors of a Specialized Multiprocessor System	83	113
A.E. Serik: Organizing of Computer Calculations in Informationally Connected Programs	90	122
Yu.I. Bezzubov: An Optimal Plan for a Computational Process of a Controlling Computer	95	127
Ya.N. Kobrinskiy and A.R. Tizenberg: A Method of Finding a Sequence for Asynchronic Logic Grids	98	131
DATA PROCESSING		
A.P. Trifonov: Reception of a Discontinuous Quasideterministic Signal on a Gaussian Noice Background	99	146
V.N. Vinogradov, G.A. Golubev, S.G. Kuznetsov, and N.A. Livshits: The Method of Polynomial Filtering of Random Processes with Discrete Time	106	154
AUTOMATIC CONTROL		
A.A. Krasovskiy: A Suboptimal Algorithm for Estimating the Coordinates of a Moving Object	113	161
V.I. Kapalin: Identification of Nonlinear Systems by Wiener's Method with the Use of Regularization	119	168
A.Ya. Kruger and B.Sh. Mordukhovich: Minimization of Nonsmooth Functionals in Optimal Control Problems	126	176
V.I. Gurman and V.A. Baturin: Construction and Estimation of Approximate Synthesis of Optimal Control	133	183

	English Page	Russian Page
AUTOMATION OF RESEARCH		
S. V. Solntsev: Realization of Recognition with the Aid of a Two-Dimensional Homogeneous Structure	139	188
Ye. A. Yerokhin and B. R. Loginov: A Method of Approximating a Discrete Probability Density in Recognition Problems	147	197
BRIEF COMMUNICATIONS		
I. B. Shenderov: A Modification of the Algorithm for Random Search for a Solution of Discrete Programming Problems	153	203
O. F. Kelmyshev: Some Covering Problems (Algorithms with Power Estimates)	155	205
I. B. Russman: Invariant Functionals	159	209
M. Yu. Kitayev and S. F. Yashkov: Distribution of the Conditional Sojourn Time in a System with Division of Time of Servicing	162	211

Number 5

MANAGEMENT AND OPERATIONS RESEARCH		
A. N. Dambrauskas: Statistical Characteristics of Simplex Search	1	5
I. A. Sholpo: Solutions of Arbitration Schemes as Equilibrium Points of Coalitionless Games in Normal Form	8	13
A. M. Gershanov: Convex Games on Nonconvex Sets	14	20
M. S. Shtil'man: Repeating Games with Changing Value of the Payment Unit. II. Equilibrium Situations	20	26
Yu. A. Zak: Algorithms for Nonlinear Pseudo-Boolean Programming	29	35
B. Ye. Fedunov: Conditions for Optimality of Control in a Statistical Problem with Phase Constraints when There is Incomplete Information Regarding the State of the Object	40	46
T. T. Tenev: Decomposition of Linear Cutting Problems	50	56
ARTIFICIAL INTELLECT AND ROBOTICS		
A. N. Averkin, G. Guida, D. A. Pospelov and M. Somalvico: Generalized Strategies in Problem Solvers	55	71
QUEUEING THEORY AND RELIABILITY		
G. I. Falin: The Exit Flow of a Single-Line Queueing System when There are Secondary Orders	64	93
I. V. Pavlov and I. A. Ushakov: The Asymptotic Distribution of the Time Until a Semi-Markov Process Gets Out of a Kernel	68	97
Tran Min Tiyen: Estimates for Piecewise-Linear Markov Processes Made with the Aid of the Trial Function Method	73	102
Ya. G. Genis: The Asymptotic Behavior of a Flow of Rare Events in a Regenerating Process	77	107
Yu. M. Paramonov and A. L. Savvin: Determination of an Assigned Reserve with Allowance for the Number of Objects in Use	84	114
COMPUTERS AND AUTOMATA		
A. P. Ryzhkov: Methods of Solving a Problem of Weighted Coloring of a Graph	89	119
A. Ya. Tetelbaum and B. L. Shramchenko: Application of Hypergraphs in the Study of Planarity of Electronic Circuits	95	127
PROCESSING OF INFORMATION		
N. A. Ivanchuk: A Posteriori Analysis of Random Flows of Objects in the Case of Repeated Observations	103	137
V. N. Prokof'yev: The Maximin Solution of the Problem of Detection with a Vector Informative Parameter	110	145

	English Page	Russian Page
AUTOMATIC CONTROL		
A.A. Krasovskiy: Identification and Estimation of Linear Systems when One is Observing Derivatives	115	150
I.A. Vaykhman, M.L. Litvak and M.V. Meyerov: The Problem of Optimal Control for Multiply Connected Systems with Distributed Parameters	122	158
S.A. Doganovskiy and K.V. Yegorov: A Comparison of Algorithms for Searchless Adaptation Systems with a Model	130	167
A.I. Moroz and K.A. Pupkov: On One Method of Synthesis of Relay-Linear Control Laws	138	176
AUTOMATION OF INVESTIGATIONS		
V.A. Kudryavtsev: A Method of Solving the Problem of Placing the Components of Technical Systems	145	183
BRIEF COMMUNICATIONS		
V.G. Labunets and O.P. Sitnikov: The Use of a Fast Multidimensional Fourier Transformation for Polynomial Representation of Multiple-Valued Logic Functions	152	202
V.O. Vyazemskiy: Intensity of Flow of Points of Crossing of a Threshold by a Random Impulse Process	155	206
E.S. Antipenko and G.N. Feofanov: The Correlation Function of a Poisson Flow of Rectangular Nonoverlapping Impulses of Fixed Duration	159	209
N.I. Ringo: The General Linear Problem of Observation for Linear Discrete Systems	162	212
D.A. Abdullayev and D. Yunusov: An Algorithm for Recognition of Symmetric Boolean Functions	164	214

Number 6

MANAGEMENT AND OPERATIONS		
S.A. Chigir': Informational Game Problems of Approach and Avoidance	1	5
A.A. Chikriy: Sufficient Conditions for Avoidance in Nonlinear Differential Games between Several Persons	8	14
N.B. Gusyatnikov: A Differential Game of Avoidance between m Persons	15	22
V.G. Kuznetsov: Solution of an Integer-Valued Problem of Distribution of Resources in the Case of Renewal Operations	26	33
G.B. Gens and Ye.V. Levner: Approximate Algorithms for Certain Universal Problems in Scheduling Theory	31	38
ARTIFICIAL INTELLIGENCE AND ROBOTS		
V.D. Belenkov, S.V. Gusev, Yu.K. Zotov, V.I. Ruzhanskiy, A.V. Timofeyev, V.M. Frolov, and V.A. Yakubovich: Adaptive System for Control of Autonomous Mobile Robot	37	52
V.A. Malyshev and A.V. Timofeyev: Algorithms for Construction of Programmed Manipulator Motions with Consideration of Constructional Constraints and Obstacles	46	64
V.P. Pyatkin and V.Ya. Sirotenko: Path Planning by Robot	54	73
QUEUEING THEORY AND RELIABILITY		
Yu.D. Umrikhin: Reliability of a Periodically Controlled System	60	80
L.G. Afanas'eva and I.V. Mikhaylova: On the Number of Demands Serviced during a Busy Period	67	88
G.L. Brodetskiy: Effectiveness of Storage of Intermediate Results in Systems with Failures that Destroy Information	75	97
E.A. Danielyan and N.C. Zemlyanoy: Correlation Coefficients of Lengths of Queues in a Single-Channel Queueing System with Relative Priority	81	104

	English Page	Russian Page
